

Changer le port du PFsense

- Se connecter au WebGUI de PFSENSE

- Onglet system -> Advanced
 - Cocher la case HTTPS
 - TCP Port : 8443
 - Save

A screenshot of the 'webConfigurator' interface. The 'Protocol' section has two radio buttons: 'HTTP' and 'HTTPS (SSL/TLS)'. The 'HTTPS (SSL/TLS)' option is selected. Below this, there is a dropdown menu for 'SSL/TLS Certificate' showing 'webConfigurator default (62dba8c2447ab)'. A note states: 'Certificates known to be incompatible with use for HTTPS are not included in this list.' Below that, the 'TCP port' is set to '8443'. A note at the bottom says: 'Enter a custom port number for the webConfigurator above to override the default (80 for HTTP, 443 for HTTPS). Cha'.
