

[PFsense] Changer le port du Pfsense

- Se connecter au WebGUI de PFSENSE

- Onglet system -> Advanced
 - Cocher la case HTTPS
 - TCP Port : 8443
 - Save

A screenshot of the Pfsense webConfigurator interface. The title bar says 'webConfigurator'. Below it, there are two radio buttons for 'Protocol': 'HTTP' and 'HTTPS (SSL/TLS)'. The 'HTTPS (SSL/TLS)' option is selected. Underneath, there is a section for 'SSL/TLS Certificate' with a dropdown menu showing 'webConfigurator default (62dba8c2447ab)'. Below this, there is a text input field for 'TCP port' with the value '8443'. At the bottom, there is a small text note: 'Enter a custom port number for the webConfigurator above to override the default (80 for HTTP, 443 for HTTPS). Cha'.
